### **Chemistry: The Central Science, 14th Edition Test Bank**

Chemistry is one branch of science. Science is the process by which we learn about the natural universe by observing, testing, and then generating models that explain our observations. Because

the physical universe is so vast, there are many different branches of science (Figure  $\{\text{PageIndex}\{1\}\}$ ).

### **1.1: Chemistry - The Central Science - Chemistry LibreTexts**

The fundamental chemistry of each element determines its strength, surface qualities, combustibility, and much more. Physics. Chemistry and physics are interdependent, with neither field being completely understandable without the other. If there is any science that has a claim to being the central science other than chemistry, physics would be it.
